

Sudden Hearing Loss Support

Information and support for people affected by
sudden hearing loss

www.suddenhearingloss.support

As well as a sudden loss of hearing, other symptoms may include:

- Hearing a "pop" at the time of the loss
- A feeling of fullness or pressure in the ear
- Ringing in the ear (tinnitus)
- Dizziness or a spinning sensation (vertigo)

Sudden hearing loss is a medical emergency and requires immediate treatment.
Delaying treatment can affect your chances of recovery.
